

## Clever Student Login

---

Clever is an easy way for students to access online learning applications in one place. After a student logs into Clever, they will see the applications appropriate to their grade level and schedule.

Clever can be used in school and at home; it will function the same anywhere the student has internet access.

### To log into Clever:

Go to the Clever website: [www.clever.com/in/millcreek](http://www.clever.com/in/millcreek)

Students will use their Google Account to log into Clever. Username is studentid@mtsd.org and the password has been set by the student.

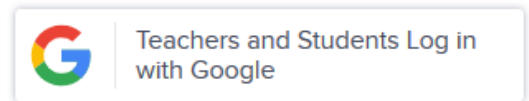

Click the Student log in button. If the student is already logged into their Google Account, they will not need to log in again, and will automatically be logged into Clever.

### Millcreek Township School District

#### Hints for logging in with Google

Username hint:  
District Google username (@mtsd.org)

Or if student is logged into a Chromebook, they can click on the Clever icon  in the upper right corner of the Chrome screen. Because the student has logged into the Chromebook, they will click the Student Log in button and their Clever Dashboard will appear.

### Using Clever

Once in Clever, the student will see their dashboard. The dashboard contains links to classroom applications and other online resources. Available applications and links will differ for each student depending on their grade level and courses. Students only will see applications and links for resources used in their classes.

To access an application, simply click the icon. Many of the applications have a relationship with Clever and will directly log the student into the application – the student does not need to enter the login credentials for the application. Some applications may ask the student to enter their credentials for that application the first time they access via Clever; after the initial log in, Clever will remember the credentials for future access.
